

Poštovani,

prosljeđujem E-postu, vezanu uz moguću izradu tehnološkog projekta, inovacije i pripadajućeg poslovnoga plana, te njihove prijave od strane naših studenata ili studenata koji su završili studije (neovisno o stupnju).

Uvjet je da u stručnoj skupini, koja se prijavljuje na natječaj, mora biti 1. član student, a ostali mogu biti i profesori, odnosno mentori.

Rok prijave; 01/07/10

Mrezni Izvori:

Mali izvod iz natječaja:

What is the Intel® Challenge?

The Intel® Challenge Europe is a regional business plan for university students. In collaboration with prestigious education institutions and entrepreneurship organizations across Europe, Intel is excited to launch the Intel® Challenge Europe this year.

## „PRIZES“

Four prizes are awarded at the regional level:

There will be two winning teams from Eastern Europe and two winning teams from Western Europe. The four winning projects will participate in the Intel®+UC Berkeley Technology Entrepreneurship Challenge (IBTEC) to be held in November 2010 in Silicon Valley, with covered travel costs for three people per team. IBTEC is a global business plan competition that brings together some of the best technology projects and talented entrepreneurs in the world. Winners will have a full itinerary of visits with Silicon Valley's most recognized start-ups and meetings with investors and contacts in the sector relevant to the projects submitted.

The winners from each country will receive official recognition and local media exposure.

All finalists will enjoy an online education program that will train them with the necessary elements to launch their ventures. Webinars will be available on a variety of entrepreneurship topics, including how to write an executive summary and a winning business plan, how to present and pitch to investors, intellectual property issues and financial projections.

In addition, a mentoring program with U.S. mentors is made available to each semi-finalist team. These connections coupled with the numerous contacts, media exposure and feedback made possible by the competition, will contribute to the success of your venture.”

---

Proposals should be directed to the development of technologies that may include, but are not limited to the areas of wireless computing, digital home, enterprise and consumer software, energy, nanotechnology, semiconductors, digital health and biotechnology.

Hello,

I am forwarding information about the Intel Challenge business plan competition, [www.intelchallenge.eu](http://www.intelchallenge.eu), that is now open to Croatian entrepreneurs. It is easy to enter, especially if your students have participated in a business plan competition before, and the entrepreneurs have the opportunity to win cash prizes and a trip to San Francisco, CA in November. Can you please forward this to your entrepreneurship society, students and center participants?

Please confirm that you can pass information on about this exciting opportunity. I hope to see some of your entrepreneurs participate and maybe even win!

Please let me know if you have any questions.

Cheers,  
Marlene

Do you have a startup idea that you would love to pitch to Silicon Valley entrepreneurs and investors?

We invite you to participate in this competition to win cash prizes and a trip to participate in the global US\$25K Intel + Berkeley Technology Entrepreneurship Challenge at the University of California, Berkeley. As a participant, you will receive coaching from local and US mentors, access to webinars and feedback on your idea from experts.

**Eligibility requirements:**

- We accept projects from students or recent graduates of any level of formal academic study.
- All team participants must be adults under the laws of the country of origin of participants

- The submissions must be in English
